

Encyridion Arithmetica,
~~S. A. 45~~ O R, ~~S. 2. 39~~

A Manual of Millions: O R, ~~Q 13 a 47~~

ACCOUNTS READY CAST UP.

To shew suddenly thereby the True Value
of any Commodity, at any Price whatsoever.

And how to Resolv many Millions of Questions,
either in Reduction, or the Golden Rule, without
any use of Multiplication or Division.

In so plain a manner, that an ordinary Capacitie
may easily perceiv; and after such an infallibl way, as
no doubt can (justly) be made thereof.

The Third Edition, Corrected and Amended.

And there is also a Second Part added thereunto,
which is of so great conernment, as wil make the Book
far more useful than ever it was heretofore.

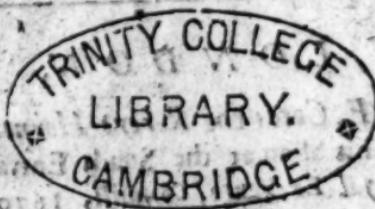

L O N D O N,

Printed by E. Cotes for Robert Horne, and are to
be sold at his Shop at the South Entrance of the
Royal Exchange, Cornhill, 1670.

A MILLION OF MILES A GOODNIGHT READY CAST UP

Colloquium S.S. ac Individuo
Trinitatis in Academia
Cantabrigiensis

To al such as deal in

A C C O U N T S,

Who desire to improov their short time to
the best advantage, the Autor wisheth
al furtherance.

Considering (*Christian Reader*) how short our time is, what great caus have we to spare at much thereof as possibly we may from our Worldly Imploiments, to the end we may more freely employ our selvs in the use of al holy means, for the examining of our deceitful hearts, and the casting up of our Spiritual Accounts, (so as thereby we may gain the Peace of a good Conscience, and the Assurance of Eternal Life) and the rather, becaus there is not only a necessity ly's upon us for the doing of it, but also the Work is so great, and the hindrainces thereof are so many, that when we have don our best, we are but unprofitabl servants? As a special help for the sparing of much time (which may be a great furtherance thereunto) I do present unto thee this useful Book, containing therein al sorts of Sums, so truly cast up, and after so plain a manner, that thou may st suddenly know thereby the true Value of any Commodicie at any Price whatsoever, and how to resolv multitudes of difficult Questions (which are necessarie to be known) without any use of Multiplication or Division; after such an infallibl way (in divers plain and familiar Examples, which I refer thet unto at

To all such as deal in Accounts.

The end of the first Book) as may giv thee sufficient satisfaction to believ the truth thereof. Also, who soever thou be' est that art ingenious, if thou diligently perusest this Book (forasmuch as al the Sums hereof are set down after such a decimal manner, as the like hath not been don by any heretofore) thou may'st plainly perceiv, that it is far more useful than may conveniently be exprest in writing. I have now at this time (through the importunity of many) not only printed the Second Edition thereof, but have also added a Second Part thereunto, which (I hope) wil make the Book far more useful than ever it was heretofore: And with-al (as I did formerly) I have taken care so to peruse the Book, that non might receiv wrong thereby. Furthermore (Christian Reader) whereas I premist long since to publish such a Book as might be a special help for the true-reading and writing of *English*, I giv thee heer to understand, that since that time I have taken no smal pains for the furtherance thereof, so as I have made good my promis to the ful; for I have publisht three several Books of that kind; The first Book is call'd *The English Primrose*; the second is call'd *The plainest Directions for true Writing*; and the third is call'd *The Grounds of Learning, or the readiest way of all others (after th: common way of Teaching) to the true spelling, true reading, and true writing of English*. And forasmuch as I do plainly perceiv, that the Teachers of English are very ignorant in the right way of Teaching, I shal stil be ready (as I have any opportunity) to do any further service for their good. For, as I have (for a long time) taken extraordinary pains to find out the neerest way to the reading of *English*,

To al such as deal in Accounts.

English, so (I hope) I have also found it: and my desire is not to conceal it, but rather to impart the knowledg therof to al others (whom it may concern) that they may know it as well as my self, to the end a greater good may bee don thereby: and for the further incouragement of al such who are studious (to do good) in this way, I do heer confidently affirm, that there might bee (easily) such a cours tak'n, that Children or others may learn to read English as wel in a Moonth, as they may now do (by the common way of Teaching) in a Yeer. And so commanding this, and the Book which I do heer publish, with all my other Labors, to the Blessing of God, and thy favorable acceptation, I rest,

Thine in the Lord,

RICHARD HODGES.

In laudem Autoris & Operis.

IF to admire, were to commend thy worth,
Thy pâins shou'd ne'er need prais to set thee forth:
But since I know for prais thou dost not look,
My Muse sends her Encomiums to thy Book,
And tels the Reader, That th' Epitome
Of the whole Art is bee extract by thee.
True is the Titl then, and it may well
Be call'd, of Millions a Manuel:
I wish that Millions may by this reap gains,
And then th' art paid for thy industrious pains.
So may these former Profits drive thee on
To frame som second Enchiridion.

FRANCISCUS OWEN Philomodic.

To the AUTOR.

Thy first was wrote for Children, this for Men;
Both glean the Gains from thy industrious Pen.
That taught the Learner, this the Learned teacheth,
And to each weakest Apprehension reacheth.
Thou hast a third, I hear, (Why let it ly?)
Will Women teach exact Orthographie.
Send it likewise into the World, and so
Both Fathers, Mothers, Children teach to know.

M. I. Philomathematic,

S. P. D. Autori.

Hence, Criticks, hence; this Book makes no account
Of your rude Censures, for they do surmount
All number: and besides, the Autor's pain
Sole-ly desires the Courteous Reader's gain.
A Manual 'tis but styl'd, yet comprehends
Millions of Profits for his worthy Friends;
And who so'ere thy Treatise takes in hand
By such direction (Hodges) may command
Thousands, thereby enriching Learnings Store,
Sooner by far then he that writeth more.
No farther prais thou need'st, this Enchiridion
Henceforth will vindicate thee from Oblivion.

G. I. Philomus,

These four Tabls afore-going, do plainly shew al the ev'n parts of Pounds; and therefore they ought to be very wel known, as being a special means (by help of this Book) for the dividing of any number of Pounds suddenly.

This one thing ought also to be very wel known, namely, that by adding one Cypher to any Number, you may increas the value thereof 10 times; by adding two, 100 times; by adding three, 1000 times; by adding four, 10000 times, &c.

As for Exampl,

Suppose you would know suddenly how many Farthings are in Ten Pounds, you are to look in this next Tabl aforegoing for the Farthings of one Pound (which are 960) to add one Cypher therunto, and that wil shew the Farthings of Ten Pounds are 9600; by adding two Cyphers, that the Farthings of 100 Pound are 96000; by adding three Cyphers, that the Farthings of 1000 Pound are 960000, &c.

You may know the tenth part of any Sum whatsoever (having a Cypher in the first place) by cutting off the first Cypher.

You may know the fift part of any Sum whatsoever (having a Cypher in the first place) by cutting off the first Cypher, and doubling the Sum.

THE READERS DIRECTIONS.

THERE is no great need (Courteous Reader) to giv thee any Directions for the finding out of the several Prices which are contained in the Tabls of this Book, forasmuch as they are set down at the head of every Page (wherein they are) after such an orderly manner, as that they may fully serve for most plain Directions themselvs.

Every several Page wherein the Tabls are, til you com to the Price of 2 shillings, they contain two Columns; the greater of them (towards the left hand) by adding two or more Sums together, wil shew the true value of any number of that Price which stands at the head of the Page.

The Figures which stand at the left side of each Page, from 10 to 9000, they serv as Directors, for the finding out of the true value of any number in either Column; for, all the Prices of the Great-hundreds which are in the lesser Column, do stand right against the Prices of the Suttle-hundreds that are in the other Column, so as the one may easily be found by the other.

At the foot of every Tabl throughout the whole Book for all places whatsoever, are plac'd these directing Figures, namely, 110, 144, 365, 1500, whereby divers things may be don with great expedition: As for example, If you turn to the Tabl of 15 pence 3 farthings, you may suddenly know thereby, if one el of cloth should cost 15 pence 3 farthings, what is the Price of 120 els; or, if one Book should cost 15 pence 3 farthings, you may suddenly know what cost 144 Books (which is 12 dozen, or a great gros) or, if the expence of one day be

The Readers Directions.

15 pence 3 farthings, what art the expences of 365 days (which are the days of a yeer) or, if one Book should cost 15 pence 3 farthings, what is the true value of 1500 Books.

Also by the Tabl of 15 pence 3 farthings you may suddenly know thereby (in the lesser column) if one pound of Sugre should cost 15 pence 3 farthings, what cost 112 pounds? (or, one Hundred of Averdupois weight) or any number of Hundred weights, or Thousand weights whatsoever.

And also by those directing figures 28, 56, 84, which do stand at the foot thereof, you may suddenly know what is the price either of a quarter of a Hundred, half a Hundred, or three quarters of a Hundred.

The lesser column in every pagr, it will not only shew the true value of any number, either of Hundred weights, or Thousand weights; but also how many pounds of the smal weight are contain'd therein.

Besides, you are to know, that howsoeuer the lesser column was chichly intended to shew the true value of any number of the Great Hundreds or Thousand weights; yet they wil also very fitly seru for many other occasions: As for example, Suppose that one ell of cloth should cost 15 pence 3 farthings, you may suddenly know thereby what cost 112 els, or 1120 els; for the value thereof is answerabl to the Great Hundred and the Thousand weight. And so also the number of pounds that are contain'd in any of the other Great Hundreds or Thousand weights, they may be us'd accordingly.

The Tabls of this Book, they are not only exceedingly useful for Multiplication; to shew suddenly thereby any number whisoever ready multiplied; but they are also as useful for Division, to shew suddenly thereby any number whisoever (of the even parts either of Pounds, Shillings, or Pence) ready divided: for the Tabls in the Book are fitted for that purpose: as for example, Suppose you were to divide 50 pounds amangst 16 men, you need but only to look in the Tabl of 15 pence, because 15 pence is the 16th part of one pound; and so by the same reason look there for 50 16 pences, and that is the 16th part of 50 pounds. The like may be done suddenly

The Reader's Directions.

Suddenly for the 16th. parts of any number of pound whosomever.

Or, If you would divide 50 shillings amongst 16 men, you need but to look in the Tabl of 3 farthings, becaus 3 farthings is the 16th. part of 1 shilling, and so by the same reason look there for 50 3 farthings, and that is the 16th. part of 50 shillings. The like may be don for the 16th parts of any number of shillings whosomever.

Or, if you would divide 50 pence amongst 16 men, you need but only to look in the Tabl of quarter-farthings, becaus one quarter-farthing is the 16th. part of one penny, and so by the same reason look there for 50 quarter-farthings, and that is the 16th. part of 50 pence. The like may bee don for the 16th. parts of any number of pence whosomever.

And so also by the same reason, for Averdupois weight, at 16 ounces the pound, you may suddenly know at any price the pound, what is the ounce.

If you desire also to divide 50 pounds amongst 12 men, you need but to look in the Tabl of 20 pence, becaus 20 pence is the 12th. part of one pound, and so by the same reason look there for 50 20 pences, and that is the 12th. part of 50 pounds. The like may bee don for the 12th. parts of any number of pounds whosomever.

Or, if you would divide 50 shillings amongst 12 men, you need but only to look in the Tabl of pence, becaus one penny is the 12th. part of one shilling, and so by the same reason look there for 50 pence, and that is the 12th. part of 50 shillings. The like may bee don for the 12th. parts of any number of shillings whosomever.

Or, if you would divide 50 pence amongst 12 men, you need but only to look in th: Table of the 12th. part of one penny, and so by the sam: reason look there for 50 times 3 mites, and that is the 12th. part of 50 pence. The like may bee don for the 12th. parts of any number of pence whosomever.

And so by the same reason, for Troy weight, at 12 ounces the pound, you may suddenly know at any price the pound, what is the ounce.

These few Examples afore going may suffice to hav shew'd the exceeding usefulness of this Book for Divisio

The Readers Directions.

on, so as to know suddenly thereby, what are the even parts of any number whatsoever, either Pounds, Shillings, or Pence.

As for the od parts of any number, either of Pounds, Shillings, or Pence, there are Tabls purposely set down in the Second part of this Book, after so plain a manner, that an ordinary capacity may easily perceiv how to make use of them. As for exempl, Suppose you would suddenly know the 7th. part of 60 pence, you are to look in the Tabl of the 7th. parts of pence for 60 7th. parts, and that is the 7th part of 60 pence (or 5 shillings) The like may be done for the 7th. parts of any number of pence whatsoever.

Or, suppose you would know in the Table of the 7th. parts of shillings, what is the 7th. part of 5 shillings, you are to look therein for 5 7th. parts, and that is the 7th. part of 5 shillings, which is answerable to the 7th. part of 60 pence.

Or, if you would know the 7th. part of 20 shillings, then you are to look for 20 7th. parts, and that is the 7th. part of 20 shillings, or one pound: and so by the same reason you may also know the 7th parts of any number of pounds when they are turned into shillings.

Likewise, if you would know the 9th. part of 60 pence, you are to look in the Tabl of the 9th. parts of pence for 60 9th. parts, and that is the 9th. part of 60 pence, (or 5 shillings.)

Or, if you would know in the Tabl of the 9th. parts of shillings, what is the 9th. part of 5 shillings, you are to look therein for 5 9th. parts, and that is the 9th. part of 5 shillings, which is answerable to the 9th. part of 60 pence.

Or, if you would know in the Tabl of the 9th. parts of shillings, what is the 9th. part of 20 shillings, then you are to look therein for 20 9th. parts, and that is the 9th. part of 20 shillings, or one pound. And so by the same reason, you may also know the 9th. parts of any number of pounds when they are turned into shillings.

And thus much may suffice to have shewed how exceedingly useful these Tabls may be for the help of Division, for as much as there are so many difficult sums ready divided.

Also,

The Reader's Directions.

Also, I have formerly shew'd, how suddenly any one (by the Tabls of this Book) may know at any price the pound, what is the price of a Hundred weight; or at any price the Gallon, what is the price of a Tun.

So also in the Second Part of this Book I have (with much pains) set down such choice Tabls, whereby any one may suddenly know at any price the Hundred weight, what is the price of one pound &c or, at any price the Tun (either of Wine or Oil) what is the price of one Gallon. For, in these Tables are set down all prices whatsoever. And therefore whatsoever bee the price of the Hundred weight, or, of the Tuns either for Wine or Oil, you are to look in the Tabls for the neerest sum to it, and that must serve: for, if there be but a smal matter either under or over the price, you may dispense with it, becaus it can be cast up no neerer.

Likewise there is a Tabl which will shew suddenly (after the same manner) at any price the Piece of Logram, what cost an el.

There are Tabls also, whereby either Flemish aulns or French aulns are reduc't into English els.

As also such Tabls, wherein any number of great weight is reduc't in o smal; and any number of smal weight reduc't into great.

There are Tabls also which will shew suddenly, how many pence, half-pence, or farthings are contained in any number either of shillings or Pounds whatsoever.

If one yard of cloth should cost 19 shillings 11 pence 3 farthings, and you would know what cost 1000; then you are to look in the Table of 19 shillings, and you shall find that 1000 19 shillings is 950 pounds; and in the Tabl of 11 pence 3 farthings, you shall find that 1000 11 pence 3 farthings is 48 pounds 19 shillings 2 pence; the which two sums being added together, do make 998 pounds 19 shillings 2 pence: which is the true value of 1000 yards, at 19 shillings 11 pence 3 farthings the yard.

But it may be objected, Unless men knew how to provv by som Rule, whether such Questions as these are truly answered, what credit is there to be given to them?

Whereto I answer, and with al confid. That those Questions

The Reader's Directions.

questions which are truly wrought by the Art of Arithmetick, are not to bee allow'd for truths, unles the worker bee abl also by the same Art to proov how they are true.

I will therefore shew such an infallibl way how to proov any question in the Book to be truly answered, as that non shal have any just caus to doube thereof.

As for exempl.

If you would know whether this last sum be truly cast up or not, you are to consider what with 19 shillings 11 pence 3 farthings will make 20 shillings or one pound, which you may easily perceiv to bee one farthing; from thence you may safely conclude, that if one farthing beeing added to 19 shillings 11 pence 3 farthings do make 20 shillings or 1 pound, then as truly wil 1000 farthings, beeing added to 19 shillings 11 pence 3 farthings, make 1000 times 20 shillings, or 1000 pound.

By adding therefore 1 pound 10 pence (which is 1000 farthings) to the sum aforesaid, which is 998 pounds 19 shillings 2 pence, it wil make 1000 pounds; whereby it may plainly appear that the sum was truly cast up. The like may bee don for the prooving of any other sum whatsoever.

But I suppose it may be demanded, What if the price should exceed 19 shillings 11 pence 3 farthings, becaus the Tabl of the first Book wil shew no furthe? To this I answere, That it is needless to set down 20 shillings the yard, or el, or Hundred weight, becaus the giv'n number to be bought is an answer to the question.

As for ExAMPL If a Nobl-man shal buy 650 yards of cloth for funeral mourning, at 1 pound 6 shillings the yard; the question is to know how much 650 yards wil cost at that price? For answer to this question it is needless (as is aforesaid) to work for the 1 pound, becaus 650 yards at one pound the yard is 650 pounds; therefore to resolv the question, there is no more to be don, but to turn to the Tabl of 6 shillings (which is the over-price) and there it wil plainly appeare, that 650 are worth 195 pounds; which beeing added to 650, the total is 845 pounds; which is the answer to the question.

But now I suppose it may bee demanded, What if the price be of many pounds? To this I answere, That the se-
cond

The Reader's Directions.

and part which is now added to this Book is of so great concernment, that it wil suddenly answer not only al such questions, but far greater than these are; as may appear by these Exampls next following.

Supposc one Jewel cost 97 pounds, what cost 120?

O, if 144 Officers in an Army are every one to receiv for their pay 97 pounds, what are they al to receiv?

Or, if the expence of one day be 97 pounds, what are the expences of 365 days?

Or, if 97 sheets of paper will serv for one Book, how many wil serv for 1500 Books?

These few Exampls aforegoing may fidly serv to shew how exceedingly useful the Book is, for al sorts of peopl whatsoever, as deal in Accounts, who desire to improov their short time to the best advantage; and more especially, for al Pay-masters whatsoever, both by Land and Sea.

By the Tabls of the first Book, soasmuch as there are al prices set down in a most plain manner, any one of an ordinary capacity may plainly perceiv thereby, that there are many thousand of questions fully answered (without any use either of Multiplication or Division) both in the Rule of Three direct, and also in the Backer Rule.

For the understanding thereof, you may op'n the Book in any of the Tabls where you pleas: but you may take this for the first, namely, the Tabl of 10 pence 3 farthings, and there look what 9 are worth, and you shall finde in the line against 9, that 9 are worth 8 shillings 3 farthings; whereupon you may frame your question as you please, saying thus, If 9 cost 8 shillings 3 farthings, what cost 7000? and what cost 600? and what cost 50? and what cost 4? and what cost 1?

The first question beeing thus, If 9 cost 8 shillings 3 farthings, what cost 7000? Therefore for an answer therunto, you are to look in the Table for 7000, and in the same line you shal finde 313 pounds 10 shillings 10 pence, which is the worth of 7000. The second question is, What cost 600? Therefore you are to look in the Tabl for 600, where you may finde that 600 wil cost 26 pounds 17 shillings 6 pence. And becaus it is also demanded, What cost 50? you are to look for 50, and that wil shew you

The Reader's Directions.

you that go will cost 2 pounds 4 shillings 9 pence half-penny ; and because it is also required, what cost 4 ? you are to look for 4, and that will shew you, that 4 wil cost 3 shillings 7 pence ; and because the last demand is, what cost 1 ? you may assure your self (without looking) that 1 will cost 10 pence 3 farthings, because it is the price which stands at the head of the Tabl.

In the next place you are to know how to propole and resolv questions in the Backer Rule of Three, as thus : If you would know how many shal bee bought for any sum of money : to which purpose we wil ask a question, which, for your readier understanding, shal be propos'd in the former Table of 10 pence 3 farthings, where you have already found, that 7000 will cost 313 pounds 10 shillings 10 pence : whereupon you may frame any question ; as thus, If 7000 do cost 313 pounds 10 shillings 10 pence, how many shal bee bought at that rate, for any of those sums of money which stand against any number in the Tabl whatsoever, let it bee which you please ? but admit it bee the sum which stands against 6000 (which is 268 pounds 15 shillings) whereupon you may frame this question, If 7000 cost 313 pound 10 shillings 10 pence, how many shall be bought at that Rate for 268 pounds 15 shillings ? for an answer thereunto, just 6000 : and so by the same reason you may suddenly knew for any other sum in the Tabl, how many shall be bought for the same price.

And by this Rule any one may easily know how much of any commodity hee may buy for any sum of money which he intendeth to disburs ; for, when hee knoweth his price, let him turn to the Tabl of that price, and there shal hee find any sum of money which he would disburs, or with-in a littl, more or les ; and when he hath found his intended sum, let him follow the direction as is last taught; and then he shall have the exact number, or quantitie, that he ought to have for so much money.

The Tabls of the first Book will shew also how to convert the moneys of other Countries into Starling or English : therefore to convert Flemish money into English, you are to turn to the Tabl of 12 shillings : as for exempl. In 876 pounds Flemish, i.e. is demanded, how much English

The Reader's Directions.

English money? which to resolv, you are to look for 800, and in the line against it you shall finde it 480, and against 70 you shall finde 42, and against 6 you shall finde 3 pounds 12 shillings; which three sums being added together, they make 525 pounds 12 shillings. The like may bee don for any number whatsoever.

For the converting of English-money into Flemish, you are to turn to the Tabl of 4 pences, and to read the worth of every Figure in his own place, save only it is to bee read according to decimal knowledge, two places lower: as for example, In 87 pounds Starling, I demand how many pounds Flemish? To resolv this question, you are to look (in the Table of 4 pences) for 80, and against the lower number which is 8000, you shall find 133 pounds 6 shillings and 8 pence, which sheweth that 80 pounds English is 133 pounds 6 shillings 8 pence Flemish: so likewise look in the same Tabl for 7, and against the third number under it (which is 700) you shall finde 11 pounds 13 shillings 4 pence; the which two sums (133 pounds 6 shillings 8 pence, and 11 pounds 13 shillings 4 pence), beeing added together, do plainly shew, that 87 pounds English is 145 pounds Flemish. The like may be don for any other number whatsoever.

Six Merchants having adventured together 7000 pounds, and gaining 500 pounds, to know each mans share, you are to turn to the Tabl of 3 shillings 4 pences, (wherein are contained the sixt parts of any number of pounds) and to look amongst your directing Figures for 500, and it will shew you that the sixt part of 500 pounds is 83 pounds 6 shillings 8 pence, which is the share that each man must have.

Suppose also, that 600 Soldiers were to receiv a Moonths pay (accounting 18 shillings 8 pence for a Moonth for 1 Man) what must they al receiv? For the resolving of which question, you are to look in the Tabl of 18 shillings, for 600, which is 540 pounds, and in the Table of 8 pence for 600 8 pences, which is 20 pounds; the which two sums being added together, do make 560 pounds, which is the Pay that 600 Souldiers are to receiv for a Moonth.

If 7 els of linen cloth should cost 20 shillings, what cost one el?

The Reader's Directions.

Or, if 9 eis of cloth should cost 20 shillings, what cost one ei?

The Tabl of the seventh parts of shillings, and the Tabl of the ninth parts of shillings, wil fully resolv these two questions aforegoing, and al others of this kinde whatsoever.

I have also set down most plain and easie Tabls for interest; howbeit I take not upon mee heerby to shew how lawfull it is to lend in this kinde: I only shew to al such whom it may concern, what is the true interest of any sum, at 8 in the Hundred, for any time, from a yeer to a day, and medl no farther.

And withal, I have giv'n such plain directions, whereby any one may readily know by those Tabls of Interest which are for 8, what is the true Interest of any sum either at 7 l. 10 s.—7 l.—6 l. 13 s. 4 d.—6 l. 10 s.—6 l.—5 l. 10 s. or 5 l.

As may most plainly appear by these Examples heer following.

| | | |
|------------|----------|--|
| | | From pounds you are to subtract so many 15 pences as your number of pounds are. |
| For 7—10 | l. s. | From shillings, so many three farthings as your number of shillings are. |
| | d. | From pence, so many quarter-farthings as your number of pence are. |
| | | From pounds subtract so many times two shillings six pence as your number of pounds are. |
| For 7 | l. | From shillings, so many three halfpences as your number of shillings are. |
| | s. | From pence, so many half-farthings as your number of pence are. |
| | d. | From Pounds subtract so many 3 shillings 4 pences as your number of pounds are. |
| For 6-13-4 | l. s. d. | From shillings, so many two pences as your number of shillings are. |
| | | From pence, so many sixt parts of pence as your number of pence are. |

For

The Reader's Directions.

| | | |
|----------|-------|--|
| | | From pounds subtract so many 3 shillings 9 pence as your number of pounds are. |
| For 6—10 | l. s. | From shillings subtract so many 3 pence farthings as your numbf of shillings are. |
| | | From pence, so many half-farthings and quarter-farthings as your number of pence are. |
| | | From pounds subtract so many times 5 shillings as your number of pounds are. |
| For 6 | l. s. | From shillings subtract so many 3 pences as your number of shil'ings are. |
| | | From pence subtract so many farthings as your number of pence are. |
| | | From pounds subtract so many times six shillings 3 pence as your number of pounds are. |
| For 5—10 | l. s. | From shillings so many 3 pence 3 farthings as your number of shillings are. |
| | | From pence, so many farthings and quarter farthings as your number of pence are. |

Also, by those Tabls in the Book which do serv for the prices of commodities (which were not intended for Interest) you may more readily know the true Interest of a ny sum for any number of Moonths, either at 5 pound or 10 pound per Cent. than by any other Book whatsoever. As for exempl, If you would suddenly know the true Interest of any sum at 5 l. per Cent. for a yeer or twelve Moonths, you are to turn to the Tabl of 12 pence, and to invert the order thereof, by reading the directing figures which are at the left side thereof, as signifying the like number of pounds, and the sums which stand right against them, for their Interest; If for 11 Moonths, you are to turn to the Tabl of 11 pence (doing as aforesaid:) If for 10 Moonths, to the Tabl of 10 pence; If for 9 Moonths, to the Table of 9 pence; If for 8 Moonths, to the Tabl of 8 pence; If for 7 Moonths, to the Tabl of 7 pence; If for 6 Moonths, to the Tabl of 6 pence; If for 5 Moonths, to the Tabl of 5 pence; If for 4 Moonths, to the Tabl of 4 pence; If for 3 Moonths, to the Tabl of 3 pence; If for 2 Moonths, to the T-bl of 2 pence;

The Reader's Directions.

If for 1 Moonth, to the Tabl of a peny. Thus much may suffice to shew how those Tabls of Interest which are for 3, may also fitly serv either for 7 l. 10 s.—7 l.—6 l. 10 s. 6 l. 13 s. 4 d.—6 l. or 5 l.

I have also in the Second Part of this Book set down three Tabls of Interest for 6, the one for a yeer, and the other for half a yeer, and another for a Moonth, whereby any one may suddenly know the true interest of any number of Pounds for the like times : as for any other time, I refer them to make use of those Directions aforesaid.

RICHARD HODGES.

The Second Part.

All these parts both of Pounds, Shillings, and Pence, which are here set down, may so readily bee found in the Tables of the First and Second Part of this Book aforeswing, as they may fitly serve to shew suddenly the like parts of any number either of Pounds, Shillings, or Pence.

| Of Pounds. | Of Shillings. | Of Pence. |
|------------------|--------------------|--------------------|
| 2ds — 20 s. | 2ds — 4 d. | 2ds — halspence. |
| 3ds — 6 s. 8 d. | 3ds — 4 d. | 3d parts. |
| 4ds — 5 s. | 4ds — 3 d. | 4ths — farthings. |
| 5ds — 4 s. | 5t parts. | 5t parts. |
| 6ds — 3 s. 4 d. | 6ds — 2 d. | 6t parts. |
| 7th parts. | 7th parts. | 7th parts. |
| 8ths — 2 s. 6 d. | 8ths — 1 d. ob. | 8ths — half-farth. |
| 9th parts. | 9th parts. | 9th parts. |
| 10th — 2 s. | 10th parts. | 10th parts. |
| 11th parts. | 11th parts. | 11th parts. |
| 12th — 20 d. | 12th — 1 d. | 12th parts. |
| 13th parts. | 13th parts. | 13th parts. |
| 14th parts. | 14th parts. | 14th parts. |
| 15th — 16 d. | 15th parts. | 15th parts. |
| 16th — 15 d. | 16th — 3 farth. | 16ths — qu.farth. |
| 17th parts. | 17th parts. | 17th parts. |
| 18th parts. | 18th parts. | 18th parts. |
| 19th parts. | 19th parts. | 19th parts. |
| 20th — 12 d. | 20th parts. | 20th parts. |
| 21th parts. | 21th parts. | 21th parts. |
| 22th parts. | 22th parts. | 22th parts. |
| 23th parts. | 23th parts. | 23th parts. |
| 24th — 10 d. | 24ths — halspence. | 24ths — mites. |
| 25th parts. | 25t parts. | 25t parts. |
| 26th parts. | 26t parts. | 26t parts. |
| 27th parts. | 27th parts. | 27th parts. |
| 28th parts. | 28th parts. | 28th parts. |
| 29th parts. | 29th parts. | 29th parts. |

By these Examples aforeswing, it may plainly appear (as at such as are judicious) that this Book is far more useful for things of this kind, than any convenient way except in writing.
